

Alter ECO
BambooCabinets.com

Bamboo Cabinets by AlterECO, pioneers in modern bamboo cabinetry.

Up to 8 inches in diameter & 80 feet tall - this is some amazing grass! Milled into narrow strips & laminated into robust, stable panels, bamboo takes on a beauty & allure that is entirely new - yet informed by a long, illustrious past. Strong & durable as well as environmentally & socially responsible, the Moso species of bamboo we use is harvested at maturity by independent farmers & is fabricated to precision specifications that surpass strict European standards for indoor air quality. While bamboo is the feature material on our design palette, AlterECO has been innovating with a growing variety of healthy green materials since 1997.

Please visit us online or contact us for an appointment at our Sausalito showroom. Quotes may be obtained by emailing, faxing or mailing drawings and general info for your project.
